

Free Dental Extractions

Dr. Koerner Oral Surgery Course

What: Free dental extractions for qualifying patients

When: April 29th, 30th, and May 1st

Where: Washington Academy of General Dentistry Learning Center
19415 International Blvd, SeaTac, WA 98188

The Washington Academy of General Dentistry has offered an opportunity for **free dental extractions during a three day program on April 29th, 30th, and May 1st**. This opportunity is available to those who are in generally good health and believe that they are in need of having a tooth or teeth removed. There will be no replacement of teeth as a part of this program. All dental treatment will be conducted by licensed and certified dentists who are participating in an advanced surgery teaching program.

In order to be approved for the program, you will need to be screened by the Washington Academy of General Dentistry supervising doctors and have appropriate diagnostic imaging completed to assess your teeth. The screening visit will be a separate appointment prior to the day of the procedure. Both the screening visit as well as the treatment will be completed at the Washington Academy of General Dentistry Learning center in Seatac, WA.

This program is designed as an advanced surgery training program for AGD doctors. Being that this is a training program, you will need to have flexibility with appointment times and appointment duration. **Again, all services are free of charge to the patient, including diagnostic imaging.**

If you are interested in participating, please email info@washingtonagd.org to schedule your screening visit.
